

# Measure Desktop for Windows

## Why Measure Desktop?

Whether you estimate flooring for commercial projects, high-end residential, multi-family or new home construction, you need to efficiently and accurately perform takeoffs and provide professional bids to your clients.

Measure Desktop enables you to:

- Create more accurate estimates in less time
- Increase efficiency of estimating and bidding
- Realize increased sales and higher profits

## Measure Desktop Fulfills Your Estimating Needs

### Accuracy

- Automatically calculate estimates and layouts of roll product while allowing total control over cut placement
- Calculate plank and tile quantity for both floor and wall surfaces, including complex tile designs for the largest commercial jobs
- Avoid underbidding by capturing all project details, including labor, transitions, base, and other add-on products

### Profitability

- Create low-waste estimates for all flooring types
- Close sales quickly with professional looking bid documents
- Reduce estimating time
- Easily apply margin and overhead percentages to cost

### Efficiency

- Syncs with Measure Mobile to allow for onsite drawing or measurement verification
- Integrates with RFMS business management software
- Collaborate with your team on the same projects using the shared project library
- Import graphic files (PDF, CAD, JPG, etc.) and automatically create rooms or trace them with the assistance of intelligent drawing tools
- Change products with the click of a button to show multiple estimate options
- Design in 3D and 2D simultaneously

# Built for Quick and Accurate Estimates

1. Import the blueprint image and create rooms

2. Search for and apply materials to each room

3. Add project details such as transitions or add-on materials and services

4. View and edit the roll plan as needed

5. View the worksheet results (export to RFMS or print reports)

## Measure Desktop Meets All Your Estimating Needs:

- ✓ Accuracy
- ✓ Efficiency
- ✓ Profitability
